

**How I put on my mask to keep myself safe travelling to school and home again.**

**Step 1,** I have to wash my hands for 20 seconds or sing the ‘happy birthday’ song twice

**Step 2, for putting on my mask to keep myself safe**

This one will  
go on my  
RIGHT ear

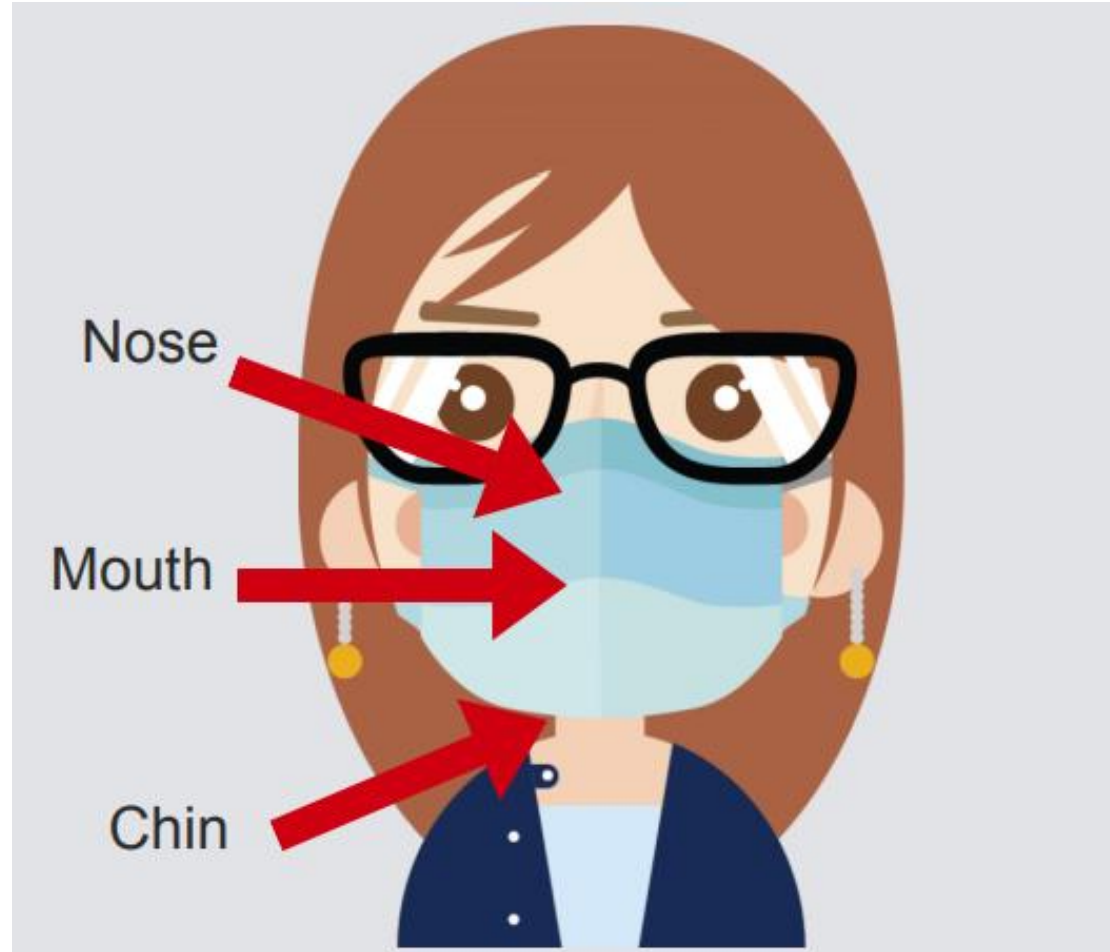

This one will go on  
my LEFT ear

My mask has 2 loops, one on each side of the mask, I have to put one loop around one ear and then put the other loop on the other ear. I need to make sure that my mask has the coloured piece on the outside and the white piece goes onto my face.

MY MASK KEEPS ME SAFE

WEARING A MASK IS **OKAY**

**Step 3,** I need to make sure that the mask covers my nose, mouth and my chin

While I am wearing my mask I must remember not to keep touching it

## Taking off my mask

When I am in my house, or when I get off the school transport, I can take off my mask.

I do not need to wear my mask in school. But I must keep it safe.

**Step 1**, I have to wash my hands for 20 seconds or sing the 'happy birthday' song twice or I can use sanitizer.

**Step 2,** I will need to use my hands to unhook the loops from my ears, I need to do both at the same time.

When I am at school, I will need to put it in a safe place for home time.

**Step 3,** I will remove the mask from my face holding onto the loops and throw it in the bin if it is one I CAN NOT re use.  
If I have a fabric mask I will put it in the wash RIGHT away and wash my hands.
